

Sagnik Dey

Senior Product Designer

Houston, TX · sagnikd@gmail.com · +1 (346) 626 0622 · linkedin.com/in/deysagnik · sagnikdey.com

Professional Summary

Senior Product Designer with 16+ years turning complex business and operational requirements into intuitive, responsive enterprise applications. Led UX for route management, store fulfillment, and master data platforms supporting 7-Eleven's global store and delivery network. Known for bridging business, IT, and engineering: running requirements workshops, presenting design recommendations to stakeholders, and delivering developer-ready specs and coded prototypes for Angular and React teams. Built and shipped a design system (Figma variables, React components, design tokens) that cut design-to-dev handoff time by 35%, and stays engaged through implementation to make sure what ships matches the design.

Core Competencies

Leadership & Strategy: Product Design Leadership • UX Strategy & Roadmapping • Design Program Management • DesignOps • AI-Powered Design Workflows • Team Mentorship • Stakeholder Management • Cross-functional Facilitation

UX Process: Requirements Translation • End-to-End User Flows • Information Architecture • Wireframing & Prototyping • Usability Testing • Heuristic Evaluation • Journey Mapping • WCAG 2.2 AA Accessibility

Stakeholder & Delivery: Business-IT-Engineering Facilitation • Design Presentations & Recommendations • Developer Handoff Specs • Design QA Through Implementation • Agile / Scrum

Design & Tech: Figma (variables, components, Dev Mode) • Design Systems & Tokens • Responsive & Mobile-First Design • HTML / CSS / SASS • JavaScript • React • Angular • React Native • Claude Code • Cursor • Git

Professional Experience

Freelance — Senior Product Designer

Houston, TX · May 2026 – Present

- Design responsive web and mobile product experiences for clients, from requirements gathering through high-fidelity design and developer handoff.

7-Eleven Global Solutions Center — Product Design Manager

Bengaluru, India · Nov 2023 – Feb 2026

- **Master Data Management (MDM) platform:** Led end-to-end UX for MDM, 7-Eleven's core master data application, and the services within it: Item onboarding & management, Vendor onboarding & management, Store management, and Route management. Drove the redesign of the Route management service, translating logistics and delivery-network requirements into clear flows for creating, configuring, and maintaining routes.
- Designed data-dense, responsive screens and end-to-end flows for vendor, item, store, and route data, turning complex onboarding and configuration rules into intuitive workflows that operations teams rely on daily.
- Redesigned the Store Fulfillment application for iOS and Android, modernizing legacy screens and streamlining operational workflows for store staff across multiple regions.
- Served as the bridge between business, IT, and engineering: partnered daily with 40+ engineers and 8 product managers, ran requirement and feedback sessions, and presented design recommendations to stakeholders to align short- and long-term product direction.
- Architected and shipped the 7-UI Design System (Figma variables, React component library, design tokens) from zero to production, cutting design-to-dev handoff time by 35% and helping engineers ship features 30% faster across 5 enterprise platforms.
- Delivered developer-ready specs, annotated flows, and coded prototypes for engineering teams, and stayed involved through implementation with design QA to ensure builds matched intended design.
- Conducted heuristic evaluations and client sessions on the Promotion Engine Platform; clickable and coded prototypes for usability testing improved client sign-off speed by an estimated 20%.

- Led a Lean UX redesign of the 7-Eleven Hawaii app (~20,000 active users), combining Mixpanel analytics and survey research for a ~25% improvement in task completion.
- Introduced AI-assisted prototyping (Claude Code, Cursor), reducing design-to-prototype iterations from 5 rounds to 2–3 per feature; managed and mentored a team of 4 designers.

DoctoronCall — Lead UI/UX Designer

Kuala Lumpur, Malaysia · Nov 2021 – Nov 2023

- Led the redesign of the desktop and mobile apps, grounded in qualitative research including user interviews and ongoing user input, translating findings into clearer flows, navigation, and high-fidelity designs.
- Ran quantitative analysis of mobile app behavior with Hotjar (heatmaps, session recordings, funnels) to pinpoint friction points and prioritize redesign decisions.
- Led UX and UI design for marketplace platforms across desktop and mobile, creating reusable component systems that accelerated feature delivery by an estimated 30%.
- Conducted user research on personalization needs and established a design system that standardized UI patterns, reducing design review cycles from ~5 rounds to 2–3 per feature.
- Analyzed behavioral data and user metrics to drive iterative improvements, modernizing legacy interfaces and improving key engagement metrics quarter over quarter.
- Gathered requirements from internal teams and enterprise clients to design back-end interfaces serving both audiences, reducing support escalations related to UI confusion by an estimated 25%.
- Partnered with marketing and sales teams to introduce engagement-driving design concepts, contributing to new feature adoption initiatives.

Freelance Product & UX Designer

Kuala Lumpur, Malaysia & Texas, US · Feb 2015 – Oct 2021

- Led design and front-end development on an enterprise risk management (ERM) platform: produced user flows and high-fidelity prototypes and shipped HTML/CSS/React components with coded specs, reducing developer rework by an estimated 40%.

- Directed adoption of React, React Native, and Angular to modernize front-end architecture across platform redesigns.
- Ran full UX engagements for Hello World Studio (Austin, TX) and others: research, journey mapping, prototyping, usability testing, and HTML/CSS delivery.

Bazaarvoice — Senior User Interface Designer

Austin, TX · Jan 2010 – Feb 2015

- Designed and at times developed UIs for enterprise SaaS products (Ratings & Reviews, Ask & Answer) serving 25+ global accounts including Under Armour, Nike, and Best Buy.
- Ran usability testing and A/B-informed iteration to reduce friction in key flows; partnered with PMs and developers to ensure feasibility and consistency at scale.

Earlier Roles

- **Tangelo Ideas** — Front-End Designer, Texas, USA (Dec 2008 – Dec 2009)
- **Tata Consultancy Services** — UI Designer (IT Analyst), Pune, India (Feb 2007 – Oct 2008)

Education

B.Sc. Mathematics — Rani Durgavati University, India

Certifications

- Conducting Usability Testing — Interaction Design Foundation
- Mobile UX Design — Interaction Design Foundation
- UX Interaction Design — DesignLab
