PROFESSIONAL SUMMARY

UX Strategist & Product Designer with 16+ years of experience leading end-to-end design and shipping production code for enterprise and startup platforms. AI-fluent builder who combines qualitative research with data-driven iteration (Mixpanel, A/B testing) and LLM-powered design tools (Claude Code, Cursor, Magic Patterns) to translate user needs into measurable product improvements. Proven track record: led design + code shipping across 5 enterprise platforms, architected scalable design systems that reduced design-to-dev handoff by 35%, mentored 4 designers, and drove consistent 20–35% improvements in task completion and user satisfaction. Experienced in design systems architecture, Lean UX, DesignOps, and embedding AI-assisted design into team culture.

CORE COMPETENCIES

Leadership & Strategy: Product Design Leadership • UX Strategy & Roadmapping • Design Program Management • DesignOps • AI-Powered Design Workflows • Team Mentorship • Stakeholder Management • Cross-functional Facilitation

Research & Discovery: User Research (Qualitative & Quantitative) • Usability Testing • Heuristic Evaluation (Nielsen's 10) • WCAG 2.2 Accessibility Audit • Journey Mapping • Information Architecture • A/B Testing • Data-Driven Design (Mixpanel, behavioral analytics)

Design Craft: Scalable Design Systems • Component-Driven Design • Design Tokens • Interaction Design • Accessibility (WCAG 2.2 AA) • Lean UX • Design Thinking • Prototyping & Wireframing • CSS-in-JS Design • Responsive Design • Mobile-First Design

Tools & Technology: Figma (design systems, variables, plugins) • Claude Code • Cursor • Magic Patterns • Adobe Creative Suite (XD, Illustrator, Photoshop) • HTML / CSS / SASS • JavaScript • React • React Native • Node.js • Vercel • Next.js • Design System Architecture • CMS (WordPress, Strapi) • Agile / Scrum • Git / GitHub

PROFESSIONAL EXPERIENCE

Freelance May 2026 – Till date

Senior Product Designer Houston, TX

7-Eleven Global Solutions Nov 2023 – Feb 2026

Product Design Manager Bengaluru, India

- Led UX design across 5 enterprise platforms, managing a design team of 4 while collaborating daily with 40+ engineers and 8 product managers to align design decisions with short- and long-term product vision.
- Architected and shipped the 7-UI Design System (Figma variables, React component library, design tokens) from zero to production, reducing design-to-dev handoff time by 35% and enabling 40+ engineers to ship features 30% faster across 5 enterprise platforms; mentored junior designers on design token philosophy and component API design.
- Pioneered AI-assisted design workflows on the team by integrating Claude Code and Cursor into prototyping and design-spec generation processes; documented best practices and trained 4 designers on vibe-coding design refinement; reduced design-to-prototype iteration cycles from 5 rounds to 2–3 per feature through AI-augmented feedback synthesis.
- Led end-to-end UX design of the proprietary Master Data Micro Services platform, applying scalable design systems principles to handle raw item data and configuration across 7-Eleven's global store and delivery network.
- Led Lean UX redesign of the customer-facing 7-Eleven Hawaii app (~20,000 active users), combining Mixpanel quantitative analysis and survey-based qualitative research to drive a ~25% improvement in task completion rate.
- Co-designed the 7-Eleven International corporate website (7-11int.com), coding components and integrating a Strapi CMS — bridging design and front-end engineering from concept to launch.

- Redesigned Store Fulfillment application for iOS and Android, modernizing legacy screens and improving operational UX for store staff across multiple regions.
- Conducted heuristic evaluations and client feedback sessions on the Promotion Engine Platform; delivered clickable and coded prototypes for independent usability testing, improving client sign-off speed by an estimated 20%.
- Mentored 4 designers and scaled design practices through documented decision frameworks and process guides; championed accessibility (WCAG 2.2) and eliminated design-engineering silos across all product lines.

DoctoronCall Nov 2021 – Nov 2023

Lead UI/UX Designer Kuala Lumpur, Malaysia

- Led UX and UI design for marketplace platforms across desktop and mobile, creating reusable component systems that accelerated feature delivery by an estimated 30%.
- Conducted user research on personalization needs and established a design system that standardized UI patterns, reducing design review cycles from ~5 rounds to 2–3 per feature.
- Analyzed behavioral data and user metrics to drive iterative improvements, modernizing legacy interfaces and improving key engagement metrics quarter over quarter.
- Gathered requirements from internal teams and enterprise clients to design back-end interfaces serving both audiences, reducing support escalations related to UI confusion by an estimated 25%.
- Partnered with marketing and sales teams to introduce engagement-driving design concepts, contributing to new feature adoption initiatives.

Freelance Product Designer Feb 2015 – Oct 2021

Freelance Product & UX Designer Kuala Lumpur, Malaysia & Texas, US

- Delivered full end-to-end redesigns for software platforms across multiple industries, working directly with business stakeholders and development teams; notable projects include restwithdignity.com and the initial-stage platform design for repowr.com.
- Led full-stack design and front-end development on an ERM platform: shipped HTML/CSS/React components, produced user flows and high-fidelity prototypes, and delivered coded specs that reduced developer rework by an estimated 40%; collaborated directly with engineers and PMs on component API design.
- Consulted on UX strategy for Hello World Studio (Austin, TX); executed a full UX process — research, journey mapping, high-fidelity prototyping, usability testing, and HTML/CSS delivery.
- Directed adoption of React, React Native, and Angular to modernize front-end architecture across platform redesign projects.
- Led full-cycle redesign of Longwood Village HOA website — requirement gathering, information architecture, UX design, and WordPress development.

Bazaarvoice Jan 2010 – Feb 2015

Senior User Interface Designer Austin, Texas, USA

- Designed — and at times developed — user interfaces for enterprise SaaS products including Ratings & Reviews and Ask & Answer, supporting 25+ global enterprise accounts across retail, apparel, and consumer electronics.
- Partnered directly with key retail industry accounts including Under Armour, Nike, and Best Buy to deliver branded, on-spec UI experiences aligned to each client's style guidelines and business goals.
- Conducted user research, usability testing, and iterative A/B-informed design to continuously improve product experience and reduce friction in key user flows.
- Created wireframes, prototypes, icons, and graphic assets across all 25+ accounts; collaborated with product managers and developers to ensure design feasibility and consistency at scale.
- Monitored design trends and emerging technologies to keep SaaS products competitive and relevant for enterprise clients.

Tangelo Ideas Dec 2008 – Dec 2009

Front-End Designer Texas, USA

- Designed and developed responsive, SEO-optimized websites and application UIs using HTML, CSS, and JavaScript in collaboration with back-end developers and SEO specialists.

Tata Consultancy Services Feb 2007 – Oct 2008

User Interface Designer (IT Analyst) Pune, India

- Designed and developed Microsoft MSN websites for 3 international locales (China, EU, UK) using advanced CSS techniques; trained and mentored junior designers on CSS standards.

EDUCATION

Rani Durgavati University, India

Bachelor of Science in Mathematics (B.Sc.)
